The two shuntophones look different, so here is the question. Do they make different sets of notes, and if so how.

- (a) The two sets of notes are very nearly the same.
• (b) The two sets of notes are both scales, but one set is in a lower key because it has longer ribbons.
• (c) The two sets of notes are both chords, but one set is in a lower key because it has longer ribbons.
• (d) The one at the left is a scale and the one at the right is a major chord.
• (e) The one at the left is a major chord and the one at the right is a scale.
• (f) They may be different, but there is no way to tell how.
